EDUCATION

University of North Carolina at Chapel Hill

Aug 2022 – May 2026

B.S. in Computer Science and Economics, Minor in Data Science

Chapel Hill, NC

- GPA: 3.88/4.0. Honors: GF Fund for Excellence in Economics, Dean's List. Credentials: Quantitative Financial Economics.
- Relevant coursework: Data Science, Data Structures, Database Management (SQL), Business Analytics, Software Engineering.

WORK EXPERIENCE

Research Analyst

Jan 2025 – Present

UNC Kenan-Flagler Business School

Chapel Hill, NC

- Developed a PySpark distributed ETL data pipeline for data engineering large-scale fuzzy matching record linkage for 350M+ rows.
- Designed QA/QC workflows that identified 15% data anomalies, ensuring data integrity to support master data management.
- Implemented data cleaning and validation in Python pandas to resolve entity resolution gaps across the aggregated data.
- Applied econometric time-series analysis for corporate political activity research. Documentated workflows in Jupyter Notebooks.

Data Analyst Intern

Jun 2025 – Aug 2025

LPL Financial

Fort Mill, SC

- Deployed a Power BI dashboard with KPIs and client segmentation for leadership to prioritize roadmap product features.
- Reported and analyzed NPS data in Excel and PowerPoint to identify satisfaction drivers and inform strategic initiatives.
- Automated extracting actionable insights with scripts in Python and R to analyze client activity, and AUM growth trends.
- Developed an internal Streamlit dashboard for Machine Learning topic modeling and summarization of client feedback.

Quantitative Researcher

May 2024 – Sep 2024

UNC Department of Economics

Chapel Hill, NC

- Conducted quantitative research on forecasting market volatility using high-frequency data and large-scale textual data analytics.
- Built a web-crawler for data mining over 500,000 headlines and 50,000 full-text articles from major media for AI textual analytics.
- Improved next-day volatility forecasts by 15% (RMSE) relative to VIX and NSI with NLP macro nowcasting and LLMs using Python.
- Used PyTorch and Keras to run batch processing jobs on GPU cloud servers, optimizing inference for large-scale neural networks.

PROJECTS

Vant

Feb 2026

Real-Time Housing Market & Social Sentiment Dashboard

Full-Stack & Data Engineering

- Deployed full-stack Next.js app using TypeScript and React, integrating a live dashboard to visualize economic and behavior data.
- Automated data ingestion from Zillow and Reddit feeds using GCP Cloud Functions into a BigQuery data warehouse for analytics.
- Developed a Vertex AI sentiment engine to quantify buyer friction points from Reddit and correlate trends with macroeconomics.

LEADERSHIP AND COMMUNITY INVOLVEMENT

Director Of Finance

Oct 2023 – Aug 2025

HackNC

Chapel Hill, NC

- Increased revenue by 30% and reduced outreach time by 60% with GSuite campaign automation and project management in Excel.
- Budgeted a \$40,000 event with 500+ participants. Managed a committee of 5 people to raise capital for the event.

Client Engineering & Technical Sales

Jun 2024 – Jul 2024

IBM

Remote, US

- Developed a customer-facing virtual assistant, translating business needs into NLP, prompt design, and RAG-based QA solutions.
- Delivered PoC PowerPoint demos and MVPs of scalable LLM and AI solutions to stakeholders for business impact and innovation.

CERTIFICATIONS AND INTERESTS

- Certificates: Intermediate SQL for Data Scientists; SQL: Data Reporting and Analysis; Bloomberg Market Concepts.
- Tools and Frameworks: Python, R, SQL, Power BI, Git, Excel, Java, PowerPoint, Tableau, Claude, Power Automate, Copilot, Agile.
