EDUCATION

University of North Carolina at Chapel Hill | Kenan-Flagler Business School

Aug 2022 – May 2026

B.S. in Computer Science and Economics, Minor in Data Science

Chapel Hill, NC

- Data Structures and Algorithms Teaching Assistant Spring and Fall 2024. Communicated difficult concepts to 400+ students
- Finance Director of HackNC. Planned 40,000\$ hackathon hosting 400+ students. Campaigned and managed client relationships
- GPA: 3.74/4.0. Honors: Dean's List (every semester). Credentials: Quantitative Financial Economics
- Relevant coursework: Corporate Finance, Database Management (SQL), Data Science, Econometrics, Business Analytics

EXPERIENCE

Data Analytics Intern

Jun 2025 – Aug 2025

LPL Financial

Fort Mill, SC

- Analyzed NPS and survey data to uncover key areas for improvement, drivers of satisfaction, and inform strategic initiatives
- Refined topic modeling and text summarization methods to distill qualitative feedback into actionable business insights
- Developed Streamlit and Power BI dashboards consolidating KPIs with detailed client segmentation for strategic reporting

Research Assistant

Jan 2025 – Present

UNC Kenan-Flagler Business School

Remote, US

- Clean large raw datasets, exploratory data analysis, ensure data quality, and time-series econometric modeling in Python
- Built a scalable parallel computing pipeline for approximate string matching, improving memory-efficiency and runtime

Summer Fellow

Jun 2024 – Jul 2024

IBM

Remote, US

- Tailored a customer-focused virtual assistant suited for NLP tasks like summarization, sentiment analysis, and entity retrieval
- Delivered demos and MVPs of scalable AI solutions to stakeholders, emphasizing business impact, usability, and innovation

Undergraduate Researcher

May 2024 – Sep 2024

UNC Department of Economics

Chapel Hill, NC

- Quantitative Research: modeling and forecasting market volatility with high-frequency financial data and textual data analytics
- Achieved 30% accuracy increase with a more robust model including NLP methodologies and FinBERT LLM to quantify sentiment
- Data mining: scraped and analyzed over 500,000 headlines (WSJ, NYT) and 50,000 full-text articles. Cloud Computing, Python

PROJECTS

Airbnb Daily Price Prediction

Feb 2024

Deep Learning Project

Machine Learning

- Fine-tuned XGBoost regression and a TensorFlow neural network to predict daily listing prices using tabular and textual features
- Engineered features from property descriptions using NLTK and built interactive geospatial visualizations with Folium

Inferential Thinking | UNC AI

Oct 2023 – May 2024

Research & Development Project

Large Language Models

- Built an ETL-compliant NLP pipeline integrating OpenAI's GPT model for summarization, tagging, and entity extraction
- Structured model outputs with Pydantic and JSON schemas. Led prompt engineering to optimize GenAI response quality

Portfolio Optimization and Risk Management | Carolina Investment Group

Jan 2024 – May 2024

Quantitative Finance Project

Modern Portfolio Theory

- Backtested market-neutral portfolio allocation with Monte Carlo simulation
- Simulated sector-constrained mean-variance optimization using CAPM

SKILLS, CERTIFICATIONS AND INTERESTS

- Programming: Python, Java, C, R, SQL (MySQL, PostgreSQL), Excel, Crystal Ball, Tableau, Git, VS Code
- Libraries: NumPy, Pandas, NLTK, LangChain, Scrapy, Selenium, TensorFlow, PyTorch, Keras, Seaborn, Plotly
- Certificates: IBM CETS Badge; Intermediate SQL for Data Scientists; SQL: Data Reporting and Analysis; Bloomberg Market Concepts
- In my free time, I enjoy being active, playing sports like soccer and tennis. I am also a tea enthusiast.
