EDUCATION

University of North Carolina at Chapel Hill

Aug 2022 – May 2026

B.S. in Computer Science and Economics, Minor in Data Science

Chapel Hill, NC

- GPA: 3.84/4.0. Honors: GF Fund for Excellence in Economics, Dean's List. Credentials: Quantitative Financial Economics.
- Relevant coursework: Data Science, Business Analytics, Database Management (SQL), Modern Software Engineering.

WORK EXPERIENCE

Research Analyst

Jan 2025 – Present

UNC Kenan-Flagler Business School

Remote, US

- Developed Apache Spark distributed ETL data pipeline for data engineering large-scale fuzzy matching linkage in Python pandas.
- Cleaned, validated and integrated large datasets to support master data management and ensure consistency for data analysis.
- Performed exploratory data analysis (EDA), and created data quality metrics for assessing accuracy and entity resolution.
- Applied econometric time-series analysis for corporate political activity research. Produce documentation in Jupyter Notebooks.

Data Analyst Intern

Jun 2025 – Aug 2025

LPL Financial

Fort Mill, SC

- Deployed a Power BI dashboard with KPIs and client segmentation for leadership to prioritize roadmap product features.
- Reported and analyzed NPS data in Excel and PowerPoint to identify satisfaction drivers and inform strategic initiatives.
- Automated extracting actionable insights with scripts in Python and R to analyze client activity, and AUM growth trends.
- Developed an internal Machine Learning Streamlit dashboard for topic modeling and summarization of client feedback.

Quantitative Researcher

May 2024 – Sep 2024

UNC Department of Economics

Chapel Hill, NC

- Conducted quantitative research on forecasting market volatility using high-frequency data and large-scale textual data analytics.
- Built a web-crawler for data mining over 500,000 headlines and 50,000 full-text articles from major media for AI textual analytics.
- Doubled volatility accuracy relative to VIX and NSI with NLP nowcasting of macroeconomic indicators and LLMs using Python.

PROJECTS

Vant

Feb 2026

Real-Time Housing Market & Social Sentiment Dashboard

Full-Stack & Data Engineering

- Deployed a full-stack Next.js app, integrating a Plotly Dash dashboard to visualize real-time macroeconomic and behavior data.
- Automated data ingestion from Zillow, FRED, and Reddit using GCP Cloud Functions into a BigQuery data warehouse for analytics.
- Developed a Vertex AI sentiment engine to quantify buyer friction points from Reddit and correlate trends with macroeconomics.

Airbnb Daily Price Prediction

Feb 2024

Deep Learning Project

Machine Learning

- Optimized XGBoost regression and TensorFlow neural network to predict listing prices using numeric and textual features.
- Engineered features from property descriptions, used KNN clustering algorithm, and created interactive data visualizations.

LEADERSHIP AND COMMUNITY INVOLVEMENT

Director Of Finance

Oct 2023 – Aug 2025

HackNC

Chapel Hill, NC

- Increased revenue by 30% and reduced outreach time by 60% with GSuite campaign automation and project management in Excel.
- Budgeted a \$40,000 event with 500+ participants. Managed a committee of 5 people to raise capital for the event.

Teaching Assistant – Data Structures & Algorithms

Jan 2024 – Dec 2024

UNC Department of Computer Science

Chapel Hill, NC

- Communicated data structures and algorithmic analysis concepts to 400+ students. Debugged Java implementations.
- Led review sessions and office hours, presenting material clearly to audiences with diverse technical backgrounds.

CERTIFICATIONS AND INTERESTS

- Certificates: Intermediate SQL for Data Scientists; SQL: Data Reporting and Analysis; Bloomberg Market Concepts.
- Interests: herbal tea, applied economics, machine learning and advanced analytics. Former varsity eSports player at UNC.
